What's new in Writer's Workbench Version 8.6?

Dear Writer's Workbench Enthusiast:

Just a quick note to alert you to the WWB Version 8.6 improvements included with this release. We are continuing work on the Word 2011 version for Apple computers.

To view a history of WWB enhancements, please visit writersworkbench.com/wwb/wwbEnhancements1.htm.
This year's enhancements -

- Fixed Visual Basic "out of range" error that occasionally occurred in Self and Personal Pronouns when analyzing long documents

- Assorted improvements in analysis headers

- A keyboard shortcut (Alt-Ctrl-Shift-C) which will be used to access a teacher-friendly menu for choosing previously set Assessment Settings in writing labs. A great tool for tuning the assessment module for different student levels and different writing assignments. Please contact us if interested in using this feature.

- Assorted improvements in WWB dictionaries and suggestions

- The "Negative" analysis now prints negative words even if the ratio of negative words is acceptable

- **WWB Support and Training** – As always, we provide free, unlimited support and training using the GoToAssist remote control program.

If you have any problems or questions or suggestions or if you would like to schedule a professional development webinar, please feel free to call or send e-mail to wwbsupport@emo.com.

Sincerely,

Greg Oij
