   - Go to Page 5 to learn about integrating Writer’s Workbench into your lesson plans. -
11. Consider the ways that you might integrate the various STEPS programs and Analyses into your class plans.
   ➢ You might use the STEPS programs to introduce a subject, to follow up on a class lecture or discussion, or to use as a review.
   ➢ You might use a program on a computer projector, or you might have the student work through the program and print it on the computer.
   ➢ You might have pairs of students work on a STEPS program; if you do, be sure that they print two copies. These printed copies can be placed in a binder to serve as a handbook for your student for your class and for future classes.

12. This chart suggests ways that the To Be programs might be integrated into lessons plans.
