## What's new in Writer's Workbench Version 8.73?

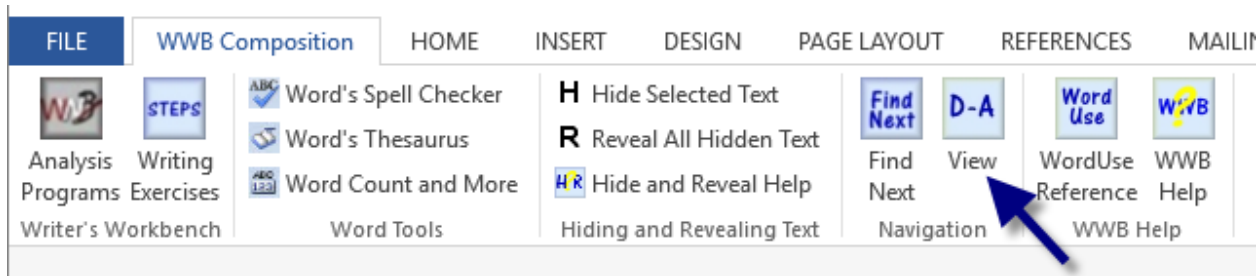

Dear Writer's Workbench Enthusiast:

Just a quick note to alert you to the WWB Version 8.73 improvements included with this release. In addition to our efforts with Microsoft Word, we are now pursuing the possibility of providing a platform-neutral on-line option.

To view a history of WWB enhancements, please visit [writersworkbench.com/wwb/wwbEnhancements1.htm](http://writersworkbench.com/wwb/wwbEnhancements1.htm).

This year's enhancements -

-  Added compatibility with Windows 10
-  Added compatibility with Word 2016 and Office 365
-  New installation software
-  New code signing software that hopefully will provide most installations with less warnings as a result of "computer paranoia"
-  Changed a button on the WWB Composition Ribbon to read "View" to make it easier to recover from a bug in Word 2016 running on Windows 7 -

-  **WWB Support and Training** – As always, we provide free, unlimited support and training using the GoToAssist remote control program.

If you have any problems or questions or suggestions or if you would like to schedule a professional development webinar, please feel free to call or send e-mail to [wwbsupport@emo.com](mailto:wwbsupport@emo.com).

Sincerely,

Greg Oij
